

PERGOLAS FROM HELLA

LIVING OUTDOORS

**Pergolas from HELLA
expand the living space to the
terrace and the garden.**

Our pergolas are elegant, have a timeless design and create a protected room outdoors.

VENTUR

The bioclimatic pergola with adjustable aluminium slats and a horizontal roof.

SINTESI

The clear, plain and elegant pergola. Create a new room on your terrace.

GHOST

A pergola completely without creases, as the cover disappears in the profiles and is thus perfectly protected.

QUATTRO

Disguises the inclination of the pergola by means of a frame and appears particularly straight.

GALILEO

The pergola that opens towards the side and offers a particularly great amount of space.

CLOSER

Closes the pergola on the side and thus creates an intimate room that is protected against rain and wind.

VENTUR

BIOCLIMATIC PERGOLA

VENTUR is the bioclimatic pergola with adjustable aluminium slats and a horizontal roof. If the slats are closed, they form a waterproof rain shelter. When the roof is opened, a cooling draught emerges in addition to the shade. This way, the terrace becomes an oasis of well-being even on hot summer days. Optionally available dimmable LED lightings provide a pleasant mood light in the evening hours. And by means of the lateral closures, you lock out the draught in the evenings, too.

ADVANTAGES

- Horizontal roofing
- Clear, straight aesthetics with sophisticated and carefully designed details
- Inclination of the slats from 0° to 135° for perfect shading and ventilation
- Waterproof when the slats are closed
- The water drainage is integrated in the construction.
- Quick installation and easy maintenance

OPTIONS

- Lighting
- 20 colours, four of them without a surcharge
- Additional vertical shadings

DESIGN & QUALITY IN DETAIL

Waterproof when closed -
a perfect protection
if the weather is not nice.

LED in the frame light up the space
underneath the pergola
with a pleasant mood light.

When opened, the slats create a pleasant
draught and provide additional recreation.
