wind speed

The rectangular aluminium cassette protects both the fabric and the articulated arms against weather and environmental influences. With its slim, modern design and timeless elegance, the TRL Sunbox commands an exceptional status in the awning market.

THE PRINCIPAL FEATURE OF THE TRENDLINE SUNBOX – STRONG ARMS

The principal feature of the TRENDLINE range is the high-quality articulated arm with a projection from 200 to 350 cm. More than 70,000 guaranteed movement sequences of the "multiflex" power belt (4 high-quality steel wires with PUR sheath) and a double spring in the articulated arm guarantee optimised long-lasting tautness of the fabric.

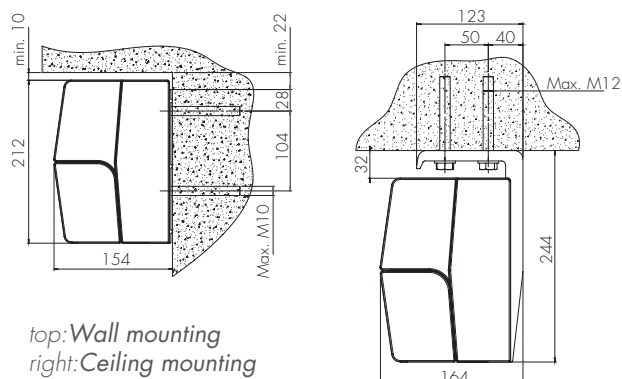

FRAME COLOURS

The TRENDLINE SUNBOX is available in the following standard frame colours: White (RAL 9010), Silver (RAL 9006), Anthracite Grey (RAL 7016M):

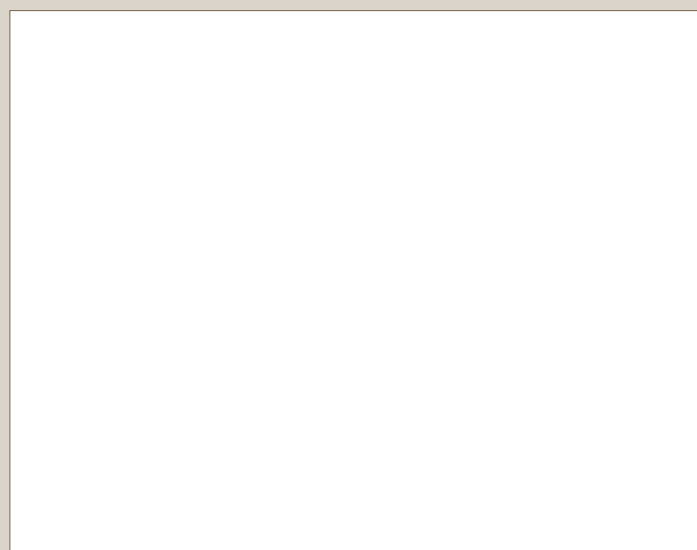

RAL FRAME COLOURS OF YOUR CHOICE

If you cannot find the perfect colour in our standard range, you can choose from a wide selection of over 200 RAL colours to add an even more personal touch to your installation.

MOUNTING SITUATIONS

Due to its flat construction, the Trendline Sunbox is particularly suitable for wall mounting. But with its strong, extrusion-manufactured bracket, ceiling mounting is just as easy.
